

Stop Unfair Competition

Congress wants to make it easier for the Postal Service to unfairly compete with private carriers like UPS. There's only one way to stop them and save your job from unfair competition.

The Teamsters Union believes that legislation should:

- Prevent the Postal Service from using billions in profits from its first class mail monopoly to subsidize other services and keep prices on package delivery artificially low.
- Stop the special treatment the Postal Service receives as a government agency from the Customs Service; the exemption from federal, state and local taxes, licensing requirements, parking tickets; and favorable borrowing rates from the U.S. Treasury.
- Give the Postal Rate Commission subpoena power and oversight of Postal Service international rates and services.
- Establish a level playing field in the package delivery industry and ensure the growth of Teamster jobs in the U.S.

Protect your job! Join the fight for fair competition in the package delivery industry.
