

AMENDMENT CONCERNING ATTRIBUTION OF COSTS

Page 7, line 12, strike "type;" and insert the following: "type, based on a transparent assessment of cost causality for each class or type of mail service in accordance with accepted economic practice;"

EXPLANATION

This amendment would refine the cost attribution factor used for postal ratemaking purposes to ensure that the method of cost attribution used by the Commission was based on a transparent assessment of cost causality, in accordance with accepted economic practice. Attributed costs would be required to reflect solely the postal costs of providing the product, and not subjective factors.
